

Autobooks works hard to make small business banking simple. Through our partnerships with banks and credit unions, small business owners have access to a modern suite of financial tools that makes running a business easier!

When you join Autobooks, you're joining a team dedicated to small business growth. We want your ideas, passion and experience to continue improving what we offer.

Our downtown Detroit HQ is in the vibrant Madison building, named one of the World's Coolest Offices by Inc. Magazine. Autobooks also has a growing presence in Texas with a satellite office in Austin; and offers flexible, remote work environments for certain roles.

Ready to help change what it means to do small business? Let's talk.

The Role: Senior Developer with a Frontend Focus (JavaScript & UI)

Within this role at Autobooks you will be a senior participant in the design and development of highly-scalable web applications that run non-stop around the world. You will utilize the latest development tools/technologies and follow agile processes/practices to deliver solutions to Financial Institutions, their small business customers and the customers of those SMBs.

A successful candidate for this role will demonstrate strong leadership, communication, and analytical skills, be highly fluent in design and development of large multi-tier systems, and possess a strong desire to tackle complex business problems with creative solutions. If you are that go-to person – the one who is relied upon to get it done when it matters the most, we want to talk to you!

Responsibilities:

- Designing, coding, and supporting leading-edge financial management web and mobile applications
- Designing and implementing improvements to the performance, usability, scalability, and maintainability of our software products
- Mentoring and coaching less experienced/skilled team members
- Influencing future technical direction
- Communicating effectively with team members, customers, and audiences of all technical levels
- Integrating our solutions with partner systems using a variety of protocols
- Continuous improvement to processes and practices with new ideas, concepts, methods and technologies
- Handling periodic on-call duty and out-of-band requests

**Required Experience/Skills:**

- BS/MS Computer Science or related field, and/or relevant work experience
- Working knowledge and belief in Agile values and principles
- Ability to work in a highly collaborative style with team members, stakeholders, and customers
- Ability to lead through influence, mentoring, discussion, and example rather than relying on authority
- 3+ Years of experience with React
- 5+ Years of experience with JavaScript and related frameworks.
- 5+ Years of experience with HTML and CSS
- 3+ Years of experience in developing mobile applications
- 1+ Years of experience in development of automated unit, component, and integration testing
- 1+ Years demonstrated experience with Visual Studio
- 1+ years with git and/or Visual Studio Team Systems with git (branching, merging, pull requests)
- 2+ Years demonstrated experience with automated builds and use of Agile or Scrum process template.
- 1+ Years demonstrated experience with Microsoft Azure cloud services
- Working knowledge of design patterns
- Experience with C#, ASP.NET and .NET framework is a bonus
- Experience with object oriented design/development is a bonus
- Experience with SQL Server is a bonus
- Working knowledge of LINQ is a bonus
- Experience with MVC, MVP, Entity framework, and NHibernate/ORMs are a bonus

Job Type:

- Full Time

Job Location:

- Detroit, MI

A flexible, entrepreneurial work environment and team atmosphere makes this a great place to work.
